Global Marine Science Summit

**Advancing the Blue Economy: Innovation,
Resiliency and Collaboration**

Oct. 9-11, 2019

**University of North Carolina Wilmington
Center for Marine Science**

The UNCW 2019 Global Marine Science Summit will focus on developing solutions for global marine science issues and improving the economic climate of coastal regions. Convening international scientists, policymakers and industry leaders, the summit will focus on areas of global concern – approaches to coastal resilience and blue economy sustainability.
